### **DETAILED ACTION**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention as amended.

The claims as amended recite "wherein projections are formed on the outer surface of the conductive film or conductive films". The projections are not formed on the outer surface of the conductive film(s). To provide support for such new feature, Applicant cited figure 7, naming 5b as the 'projection'. However, 5b is not a projection but rather a second conductive film over the first conductive film 4. 5a and 5b form a continuous coating/film, although the film is not planar, 5b does not qualify as a projection but rather a coating layer covering the projection. The projection is protruded from the surface of the base layer, not from the surface of the conductive film. Therefore, such feature of projections in the claims as amended is considered new matter. Cancellation of new matter is required.

4. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claims as amended recite "wherein projections are formed on the outer surface of the conductive film or conductive films". The projections are not formed on the outer surface of the conductive film(s). To provide support for such new feature, Applicant cited figure 7, naming 5b as the 'projection'. However, 5b is not a projection but rather a second conductive film over the first conductive film 4. 5a and 5b form a continuous coating/film, although the film is not planar, 5b does not qualify as a projection but rather a coating layer covering the projection. The projection is protruded from the surface of the base layer, not from the surface of the conductive film. Therefore, the feature of projections as amended has no support in the specification.

### ***References***

5. The Japanese patents JP-04-03692 and JP 08-05514 teach electroconductive particles comprising a base particle, protrusions formed by smaller particles adhered to the surface of the base particle, and a coating of conductive material. However, the particles formed on the surface of the base particles (i.e. forming protrusions) are not conductive material as required in the instant claims.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
